blood find nothing hold cry name close
home wrong kill black even turn way
mind truth u give think
world god die
night inside better game watch head heart alway
darkness stay blind dying flame free fate
come eye thought well burn
beyond tear
war left face
pain soul body going look
man end dead
wall reason shadow
forever path hell make
seem oh will never
wind last without said rise much
know let will want
thing skin side set fight
everything around bring fire dark gone land still long
sea hope
seen keep made
ground call new must
deep stop open high save
sun go fucking show
run good evil stand day
hide came hard behind become angel shit follow
fall love light feel
people every hear mine try feeling waiting
walk believe
fuck upon
tell
sin power scream back hand lie sky live put break
line past far coming friend living
born star earth sound
place future burning away alone heaven change
got say see
sleep cold done silence another leave one
real ride
cause need lost fear right never tonight
flesh king something care start found voice within word
take death time now dream
